# FH29LA

#### **Features**

- 120A switching capability
- Single coil and double coils are available
- External accessories such as manganese copper shunts and transformers can be ordered according to customer requirements
- Breakdown voltage (between contact and coil):4KV
- Meet standard of IEC62052-31:2005 UC3
- Environment-friendly product(RoHS compliant)
- Outline Dimensions:(110×52×24)mm
- Can be integrated design, convenient automatic installation and production
- Power frequency interference resistance, and good consistency
- Main application: smart meter

#### CHARACTERISTICS

## **■** ORDERING INFORMATION

FH29LA 3B 1 T -L1 R -XXX -DC6V

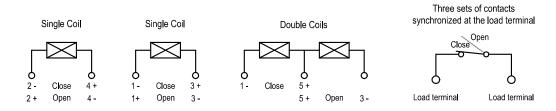

- ① Type
- ② Contact arrangement:3A=3 open contacts
  3B=3 close contacts
- ③ PCB mounting:1=Standard,

7=Customized Accessories

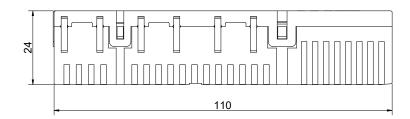

- 4 Contact material:T=AgSnO<sub>2</sub>
- ⑤ Coil type:L1=Single coil latching, L2=Double coils latching
- ⑥ Polarity:Nil=standard polarity R=reversed polarity
- 7 Customer special code:numbers or letters denote customer's requirements
- ® Coil specification:DC6/9/12/24V

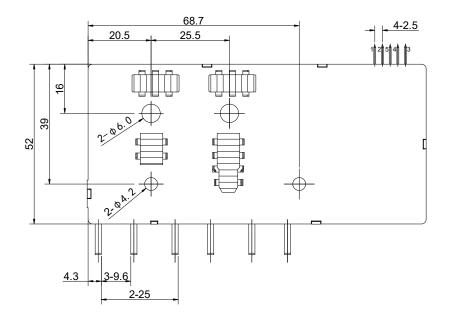

# ■ WIRING DIAGRAM AND PC BOARD LAYOUT(Unit:mm)

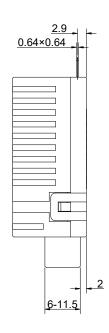

### Standard polarity wiring diagram

#### Standard shape drawing

 $Remark: \begin{tabular}{ll} Remark: (1) In case of no tolerance shown in outline dimension: outline dimension $\leq 1$ mm, tolerance should be $\pm 0.2$ mm; outline dimension $\leq 1$ mm, tolerance should be $\pm 0.5$ mm. \end{tabular}$ 

(2) The tolerance without indicating for PCB layout is always ±0.1mm.

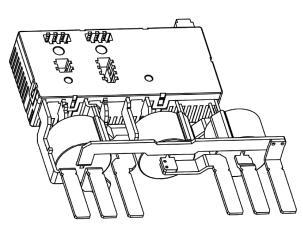

#### All-in-one solution

one inlet and two outlets

Symmetrical solutions

#### **■** NOTICE

- ① For the state of latching relay as delivered, If the customer has no special requirements, we default to the closed state before delivery, but due to transportation or relay installation by shock and other factors may change the state, so please reset it to the closed or open state as needed when using;
- ② In order to maintain the initial performance parameters of the relay, please be careful not to drop the product or be affected by external force;
- ③ In order to maintain "opening" or "closing" status, energized voltage applied across the coil should reach the rated voltage, it is recommended that the actual driving voltage be 1~1.5 times the rated voltage, Pulse width ≥100ms, and do not energize to "opening" coil and "closing" coil simultaneously, long energized time (more than 1 min) should also be avoided;
- ④ Normally the load terminals are not suitable for reflow solder, wave solder or tin solder, we suggest use spot welding. Load terminals shall be prevented from assembly stress;
- (5) Latching relays are customized products, the above cases are only for reference. If you have any questions, please contact Fanhar for more technical support;
- 6 The specification is for reference only. Specifications subject to change without notice.
